

G. S. #302 nano3

HIGH Grade Power Cable

30m(98.4ft)/Reel

● Newly Developed Coloidal Liquid for G.S.#302nano3 is consisted with Gold : 80% & Silver : 20% as Left Graph and 3-times High Density than #301

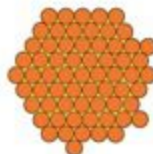

Image Drawing of the Section of OFC Conductors soaked with Gold & Silver Micro Particles(N) *Particles Diameter(3.5-8nm +3.5-8nm/1,000,000)

- ① : model No.:GSC-32 [G.S.#302nano3]
 - ② : Conductor : $\phi 0.26\text{mm} \times 64\text{-strings} \cdot \text{OFC}[\times 3\text{-st.}]$
Sectional Area : 3.398mm^2 (/64-strings) [$\times 3\text{-st.}]$
 - ③ : Coloidal Liquid : Gold:80% • Silver:20% :
3-times High Density[Compared with #301]
 - ④ : Isolator Material : Audio Grade PVC
 - ⑤ : Outer Diameter : $\phi 11.2\text{mm}$
 - ⑥ : Safety Regulation : PSE/UL/CSA/VDE, etc.
 - ⑦ : Usable Voltage : 100-250V/AC 50-60Hz
 - ⑧ : Terminated with AC Plugs Type will be available
- *Specifications may be changed without prior notice.

A Bottle of Coloidal Liquid of 3-times High Density 80% Gold + 20% Silver

● This Newly Developed Power Cable [G.S.#302nano3] is the Upper Version of our First Power Cable [#301]. We applied our Latest Nano Chemical Technology of 3-times Higher Density Coloidal Liquid for this New Power Cable. Also we selected Larger Sized Sectional Area from #301's 2.177mm^2 to 3.398mm^2 for Larger Power Transmission & for the Head-Room and Low Noise or Transparency.

Sample Photo of USA type Plug Terminated POWER STRADA 2J NEW

● This product is using same process to apply our Latest Coloidal Liquid as the other [nano3] series, which covers the surface of the high quality OFC Conductors, that helps the Movement of jumping electrons from the original conductors to the other conductors, as much as minimize the Oxygenation or Sulphidation which is harmful for Smooth Transmission of High Quality Music Signal.

● We experienced that the Gold Particles have a tendency of making the sound more Deep & Heavy (may be by the Large or Heavy Atomic character) or Rich. On the other hand, Silver Particles have a tendency of making the sound more Bright & Brilliant. So we decided to blend Gold & Silver at the rate of 80% & 20%.

We believe this ratio is the Golden Ratio for this Power Cable.

◎ We are making also Speaker Cable named [#79] series (79 is the Atomic Number of Gold) or Line(Audio) Cable named [#201] series. Please refer other document than this.
